Junction Shaft of C. & A. to ham may result in the drift hither of some skilled American underground workers. Be Concreted; Road Built to Copper King Mines.

Bisbec, Ariz, Sept. 28.-Immediate employment for more than 100 skilled miners by the Shattuck-Arigona company is one of the things that the announcement that that company will at conce begin shipments to one of the Douglas smelters. This demand for men comes at a time when it is difficult for the producing companies to fill the numerous positions underground which they have open. There are tenderfeet and greenhorns to be had, say company officials, but skilled miners are hard to find and are being picked up just as fast as they appear. That this is the case is indicated by the fact that Shattuck has been seeking to put on an extra shift but could not obtain the men wanted, both in quality and quantity.

seeking to put on an extra shift but could not obtain the men wanted, both in quality and quantity.

Muss Increase Porce.

There are now employed at the Shattuck between 15 and 100 men and only development work has been going on and no ore shipped except what was taken out in such work. With the present scheme of production in operation the force will have to be more than doubled and to obtain them men may prove difficult, although the tide has turned and miners are now coming here in larger numbers than a short sime since. At the offices of the other companies the same shertage of skilled mineral is complained of and it is hoped that the strike at Bing-strike and the strike at Bing-strike and the strike at Bing-strike and the importance of the exploration of the copy of the last 75 feet, which is now responded to the last 75 feet, which is now responded to the last 75 feet, which is now responded to the last 75 feet, which is now responded to the last 75 feet, which is now responded to the last 75 feet, which is now responded to the last 75 feet, which is now responded to the Odd Dominion mine and a fifth is being loaded. A stope has just being such a fifth is being loaded. A stope has just being loaded. A stope has just to the Copper Ring.

Houston, Texas

Will Concrete Shuft. Outside of the news relative to the action at Chicago by the directors of the Shattuck Arizona, the most important information that has been given out in the past week is that with-in a few days work will be started by the Calumet & Arkona company to concrete its Junction shaft for a depth of 1590 feet. This work will not be let by contract, but will be done by the company and is one of the most important undertakings ever known in

the camp.

The Junction is a five compartment shaft 1800 feet in depth and it has been determined to concrete it from the surface to the 1500 level. This con-crete will require less space than do the timberings now. The concrete will be mixed on the surface and run down into the moulds through pipes. The force at first will be at least 30 men and it is estimated that it will require

Rooming houses are well filled up and hotels are running to capacity. At Lowell the same crowded conditions are not so noticeable, although there are a few unoccupied houses. At Warren there are no residences for rent, but at Bakerfield there are still a few. There has been little building in Bisbee, except after the fire, for the past five years, very few homes having been erected and now the need of them is appearing and a building movement is expected to soon follow the present activity in other lines. In the city there are now only four vacant storerooms and two of these are cant storerooms and two of these are under refusal. Further increases in the operating forces at the mines are expected and the mater of accommandations is beginning to become a problem that will demand an early solution.

We would appreciate your lumber orders. Crawford, phone 428.

Superior & Boston Has 75 Men Employed; Inspiration Develops Rapidly.

Globe, Ariz., Sept. 28.-About 75 men are employed in mining and development work at the Superior & Boston mine and shipments of ore, mostly from the Limestone vein, are being made to the Old Dominion smelter. The crosscut north on the 12th level is in proken, ironstained schist, carrying native silver in varying amounts, but no copper, and the two crosscuts south are being advanced. On the eighth level, a crosscut is being driven south into the quartizite footwall, and near the end of the east drift, a drift has been started on a small vein which is reported to be showing up well in cop-

been started on a small vein which is reported to be showing up well in copper.

At the Arizona Commercial mine, the steel head frame has been moved from the Eureka to the Copper Hill shaft and is being erected. The Wellman-Seaver-Morgan, 14x20, double drum geared hoist is also being moved from the Eureka to the Copper Hill shaft and being erected. The only underground work at present consists in enlarging to three compartments and retimbering the latter shaft below the fourth level. About 20 men are employed. R. R. Boyd is superintendent.

Developing Mile a Month.

The Inspiration Consolidated company is developing the 'Inspiration mine at the rate of nearly a mile permonth and has started a new inclined shaft which will connect with the main tunnel and will be used for lowering men and timbers below the tunnel level. At the Live Oak mine, sinking continues at No. 1 shaft, which is about 575 fee? deep. At No. 2 shaft drifts are being driven east and west on the 570 foot level. The east drift will connect with No. 1 shaft, over 2000 feet distant. The widening of the Sulphide tunnel has proceeded for 579 feet from the portal. About 253 men are engaged in railroad construction under McArthur Brbs., contractors.

At the Irene silver mine near Globe, recently leased by J. A. Fleming, one of the two necessary miles of road has been purchased for use in the mine. Work will soon be started on

has been purchased for use in the mine. Work will soon be started on the second and third levels of the 225 foot shaft.

Churndrill hole No. 3 at the South Live Oak has been discontinued at a depth of 945 feet and hole No. 4 will be started about 1900 feet westerly from hole No. 3. It is reported that hole No. 3 passed through 65 feet of 2 percent copper ore, beginning at a depth of 750 feet, and at \$15 feet passed into barren ground.

Irou Cap. Drift in Ore.

At the Iron Cap mine the east drift on the 630 foot level has been in ore for the last 75 feet, which is now reported to have an average width of

values are being found in this rock and the importance of the exploration is growing daily. An immense pophyry copper mine may be opened in this direction where nothing had formerly been expected if results thus far obtained are to be taken as indicative of final results.

In the Southerwestern country, also owned by the Copper Queen, the ore deposit that abuts on the Shattuck property has been still further explored during the past week and as yet the extent of its length and depth remains undiscovered. The length has now been cut for about 200 feet.

Mining Town Houses FIH Up.

Dwelling houses in Bisbee are now growing scarce. There has been no such demand for five years and the supply in the city is nearly exhausted. Rooming houses are well filled up and hotels are running to capacity. At Lowell the same crowded conditions are not so noticeable, although there are not so noticeable, although there are a few unoccupied houses. At Warren there are no residences for rent.

been satisfactory.

Louis Wright, consulting engineer for the Lewisohns, has returned to El for the Lewisohns, has returned to El Paso after a week's visit to the Miami

Norman Carmichael, general manager for the Arizona Copper company, has returned to Clifton after spending day at the Miami and Inspiration Consolidated mines.

L. S. Cates, general manager for the Ray Consolidated Copper company, has returned from a short business trip to Globe.

YEATMAN INSPECTS MINES AT HAYDEN

Hayden, Ariz., Sept. 28.—Pope Yest-nan, consulting mining engineer for he Guggenheim Exploration company, the Guggenheim Exploration company, of New York City, spent a few days in Hayden on an inspection tour. He left for Ray, where he will inspect the mines of the Ray Consolidated. Reports are in circulation that the company has an option on several rich claims in the Superior district, and Mr. Yeatman's visit to these parts is considered for the purpose of making a further examination in the interest of his company.

TO START WINTER GOLF SEASON SUNDAY

Losing Team in Sunday Morning Match Will Pay Dinner Bill of the Win-ners at the Country Club.

The winter golf season at the Country club will be formally opened Sunday with a match which will be one of

try club will be formally opened Sunday with a match which will be one of the largest of the year. Promptly at 9 oclock Sunday morning the match will begin, playing through the remainder of the day, until all of the contestants have played through the match. The players will be paired off, making two big teams, and the losing team in the match will have to pay the dinner bill for the victors. The dinner will be served at the club house.

The following entries have so far been made for the match: C. H. Leavell, J. A. Wright, W. L. Tooley, J. T. Hill, E. Ledwedge, W. H. Shelton, Dr. B. M. Worsham, Lieut, A. N. Krogstadt, Capt, John P. Wade, Capt, F. W. Kobbe, Capt, John R. R. Hanney, A. N. Brown, H. S. Potter, Dr. James Vance, Dr. T. W. Crowder, A. W. Houck, P. J. Edwards, M. C. Edwards, Waters Davis, F. Feldman, T. Davis, C. W. Marshall, R. W. McAfee, W. F. Payne, Capt, W. L. Hart, W. L. Gaihes, J. F. Coles, W. H. Judd, W. E. Race, Mai-F. M. C. Usher, Lieut, E. O. Summer, D. C. Sutton, H. M. Andréas, Tom Newman, G. C. Wines and J. C. Wilmarth.

Contract Awarded for \$100, 000 Equipment; Shattock Will Not Build Smelter.

Douglas, Ariz., Sept. 28 .- At a specal meeting of the board of directors of the Lost Hills Oll company, the offiers of the corporation were elected.

They are:

Ben Rice, president; F. O. Rivey, vice president; H. S. Stillman, secretary-treasurer; J. F. Ross, statutory agent.

This company owns a considerable area in the Lost Hills Basin Oil field, contiguous to the property of the Arizona Oil company. A number of details of the plans for future development of the property were discussed. ment of the property were discussed. Although the Arisons Oil company has temporarily abandoned its work on account of a lack of funds, it is probable, it is stated, that it will be renewed with vigor in the near future.

newed with vigor in the near future.

Award \$100,000 Contract.

A contract including two batteries of bollers, which will equip the Inspiration and United Verde mining reduction plants, and involving a total expenditure of approximately \$100,000, has been let to the Babcock & Wilcox Co., of Barberton, Ohlo.

Although visited by the rebel forces of Campa, the mines of the Boludo district have worked on unfluterruptedly. While thefe was a large quantity of gold buillon to he secured in the district the rebels made no effort to steal any of it. The full extent of their lootings was the taking of he to steal any of it. The full extent of their lootings was the taking of a small amount of powder and food. This was gathered in an automobile driven and owned by the manager of the Palomas mine, who was compelled by the rebels to get for them. Neither he nor his machine were harmed. This is the concrete statement of James Anderson, who has arrived here from the Altar district.

Will Not Build Spelter.

Will Not Bulld Smelter.

The Shattuck-Arizona Mining company has decided that it will not erect a smelter.

It has succeeded in offcating a deal with the Calumet & Arizona Mining company for smelting, all its ores at a figure deemed very advantageous to the Shattuck.

This dual announcement was re-ceived from Chicago, where a meeting of the directorate of the Shattuck was held. The result of the announcement which will put the company into the producing class immediately, was vis-file in the stock market quotations. Shattuck closed firm with an advance

### THIRTY-FIVE READY FOR FOOTBALL GAME

Abundance of Good Timber at State College to Make Up Strong Team for This Senson.

State College, N. M., Sept. 28.—There are now some 25 men in the field for football, out of which coach Badenoch will find plenty of swiftness, brawn, cool headedness and muscle to make up one of the swiftest teams in the southwest. This first team has been very greatly strengthened by the return of eight of the first team men of last year, and there are several new men who are already making good showing. Sulfs have been given out, but there were not enough to go round so it was necessary to order new ones, which are expected soon. The men met coach Badenoch in the Y. M. C. A. during the beginning of school, and he explained the new rules, plays, signals and formations. Later they had several nights of tankling and falling on the ball. Scrimage games will be played soon.

bail. Scrimage games will be played soon.

Present indications show that the back field will be stronger this year than ever before, as three of the strong men of last year's back field are back. Capt. Bausman, Oliver Lohman and Laurens Weddell. Bausman plays full-back and was a member of the teams of 1809 and 1811, and is without doubt one of the best and strongest backs the college has ever had. Lohman will take his old position of halfback. Lane, Frenger, and Noble Brainard are the prospective quarters, and although light will doubtless, develop into swift men. Ellison will play end, and Jack Maynard is trying for a similar position. Of last year's linemen who will be with the team again this year are Joc Quesonborry, Isaacks and Herbert Smith. The football schedule will soon be completed as correspondence is being carried on with other teams, and coach Badenoch is already in receipt of a letter from the Boswell team desiring a game for Thanksgiving.

DOUBLE HEADERS AT PARK SUNDAY

Sunday, in the city league double header at Washington park, the Mill-ers, the league leaders, and the Sheltons will play the first game, and in-the second game the 22d infantry and the Bakers are scheduled to play. At Washington park this afternoon the Soldiers and the Bakers are play-

BOUCK DEFEATS PAPKE, Philadelphin. Pa., Sept. 28.—Lee Houek, of Lancaster. Pn., received the popular verdict over Billy Papke in a six round bout last night. Houck twice sent the "Illinois Thunderbolt" through the ropes. The men fought at catch weights.

Announcement. Mrs Carrie Wheless, the expert com-plexion and scalp specialist, is now as-sociated with us. The Elite Parlors,

The signal of real value should represent tone and strength; its timbre should be musical rather than harsh, and not abrupt in its warning, but, withal, should be imperative; should be easily operated and reliable; should add beauty to the car and safety to the ma-

chine, driver and public. Motoring Department, The Herald: The spark plugs in my four cylin-der engine become dirty in a very short while. What can I do to improve this condition?

By decreasing the amount of oil fed the cylinders.

### TWELVE CARS IN THE PHOENIX RACE

List Closed Oct. 10-Towns Along the Rouse of Event Send Large Checks to Be Added to Purse. Los Angeles, Cal., Sept. 28 .- If any

doubt existed a week ago as to the probability of the annual Los Angeles to Phoenix automobile race being held, ! that doubt was dissolved during the week. A visit to Los Angeles by at-torney general George Purdy Bullard, of Phoenix, and a trip along Automo-file row, accompanied by John S. Mitchell, resulted in the assurance of an entry list of not less than 12 cars.

Mitchell, resulted in the assurance of an entry list of not less than iz cars. The purse this year will be the largest in the history of the swent, and the road by the time the race date is set will be in better shape then it was ever dreamed it would be, a year ago.

Two Cadillacs are entered, one to be driven by Bill Bramiette and the other by Roy Soules, the latter one of the best known track drivers left of the old guard. There will be an American entered from the factors, according to Mr. Grundy. An Apperson will be driven by Bill Fersuson, of Phoenix, who last year handled the wheel of a Buick so creditably. Ralph Hamlin will be on his Franklin, and Louis Nikrent will handle a Buick; Fred Fuller will pilot the same National that Harvey Herrick landed the trophy with a year ago.

There is a Studebaker "30" in sight from a private owner, and a case is being suspiciously stripped at the Vance-Canavan garage, although Harvey Herrick saws he will not drive it. The

Ing suspiciously stripped at the Vance-Canavan garage, although Harvey Her-rick says he will not drive it. The Mercer factory is intent on winning the great desert classic, and Capt. Ryus is Keeping the wires hot in an attempt to seeme his big rating Oidsmobile before the entries close Oct. 19. There will he a Reo in if Harry Lord can get a car in time and he believes beyond a doubt that he can. Last, but not least. doubt that he can. Last, but not least,

a Hupmobile will try the desert grind this year and should make an excel-lent showing, in spite of the fact that it will compete against bigger cars, It is almost certain a Schacht will face the starter on the night of Oct. 26.

## School Notes

An interesting meeting of the Parent-Teachers' association of the Sunset school was held Friday afternoon in the school. The time was spent in arranging topics for the meetings of the association through the winter. A committee to arrange the programs was appointed, consisting of Mrs. Empress Arrington, Mrs. W. D. Howe, Mrs. J. W. Cathcart and Mrs. C. N. Barney. Vocal solos were given by Miss Ann Hughes. The advisability of installing a sanitary drinking fountain in the school grounds was discussed. Much attention was given to talking over the practicability of the establishing open air school rooms. The question of the amount of sleep a growing child should take was also talked spout. This was the first meeting of the winter. The next will be held the last Friday in October.

## Dances

The Gimlet club gave the first of its monthly dances Friday night in the Knights of Columbus hall. About 45 couples were present. Punch was served in the intermissions and music was played by a four piece stringed crehestra. The club will give monthly in the stringer the winter. dances through the winter.

The customary week end dance of the Country chib will be held tonight at the club house.

## El Pasoans Away
